 - Web/APP Interface:(Q4)
 - All the related files
 - Report:(Q1)
 - Report file (in PDF/PPT)
- Also, provide a video demo of less than 50 MB.(Q1 or Q2 or Q3 or Q4)
- Share the GitHub repo link on [UnStop](#).

PROBLEM STATEMENT 4

Challenge: Companies often face challenges in hiring and training highly skilled employees at the fresher level.

Objective: Develop a user-friendly platform to address this challenge, enhancing the recruitment and training experience.

Goal: Revolutionize the employee recruitment and training process by providing:

- Engaging system incentivizing learning and skill development.
- Journey-based training with rewards and achievements.
- Revenue Model incorporation while aligning with the primary goals.
- UX Strategic Problem Solving Approach.

Features: Platform includes:

- Skill assessment and tracking tools.
- Peer-to-peer comparison features.
- Social recognition of achievements.
- Many more depending on the Team.

Judging Criteria:

- Effectiveness of skill tracking and training.
- Intuitiveness and accessibility of the platform.

- Features promoting collaboration and knowledge sharing.
- Innovation in user interface design.
- Potential positive impact on employee motivation and performance.
